Hi [Ex. 4 - CBI]

Here is the file containing the remaining YSI water quality data. Also, please note that corrected data for HW54 is included in this file. Data for HW54 had been uploaded into Scribe but had an incorrect pH value. During the import process you will probably need to select "add new and update existing data".

Please let me know if you have any questions.

Thanks,

Suddha Graves

Hi [Ex. 4 - CBI]

Per your request for additional Scribe info...

1. Please find the attached file (Monitoring Data_Field Screening_Import_12_0815.csv) containing the missing field screening data. Also, I noticed that the InstrumentID field was not always correct in the field screening data already uploaded in Scribe. If you can go into MS Access and perform an update query based upon Mon_Operator = Team 2, and InstrumentID = HACH DR2700, and update InstrumentID to HACH DR890 that should correct it.
2. I have the YSI Water Quality data file, but am checking on one thing before I send it on. I will send it in a subsequent e-mail once it is ready.
3. The location for HW08a and HW08a-P are different. HW08a was from the wellhead, while HW08a-P was from the tap at a home approx. 150 feet away from the wellhead. The locational info for HW08a-P is as follows...HW08a-P has GPS coordinates of [Ex. 6 - Personal Privacy]. These coordinates were collected by me using a geo-referenced aerial (Google Earth). Also, this is the mobile home which has [Ex. 6 - Personal Privacy]. The address is [Ex. 6 - Personal Privacy] and the residents are [Ex. 6 - Personal Privacy].
4. Regarding the address city for the property table, please see the attached files (dbo_wo2933.xls, and Exp_field_defs.pdf) which I received from the County Assessor's office. It may be helpful to upload the pertinent info into the property table. If you do not want to perform a complete upload, you can still use it to pull the missing city information.

Please let me know if you have any questions or need any additional info.

Thanks!

Hi [REDACTED] **Ex. 4 - CBI**

Regarding your request for additional info...did you need water quality data from the YSI (ORP, pH, temp, conductivity, etc), or field screening data from the HACH kits (turbidity, ferrous iron, alkalinity, dissolved sulfides), or both?

Thanks,

Suddha Graves

Hi [REDACTED] **Ex. 4 - CBI**

I'll try to work on this tomorrow and get some info back to you.

Thanks!

Hi Suddha,

Thanks for checking in. When you were out at the two [REDACTED] properties, did you collect water quality data? Is there any WQ data for the second round sampling as well (ex. HW04_R2)? What about WQ for the May sampling (ex. HW63)? Was the location for HW08a the same location as where the post-processed/kitchen tap was collected?

I am also missing complete city of address for the following Property IDs: HW-29a/b, HW-37, HW-38, HW-52, HW-58, HW-59, HW-60, & HW-61 if you know what any of them are.

That's all I see that I am missing. If you see anything or want anything else added, just let me know.

Thanks,

[REDACTED] **Ex. 4 - CBI**

P.S. I just re-published Scribe.

Hi! **Ex. 4 - CBI**

Just wanted to check in with you to see if there was anything you needed from me regarding the Dimock Scribe project.
Thanks,
